PERSPEX®  
FROM LUCITE®

PERSPEX® CLEAR VISION  
PERSPEX® HI VISION

# PERSPEX® CLEAR VISION

Perspex® Clear Vision is a transparent product which gives pin point clarity to the projected image and has a glossy surface on both sides of the sheet. When the image is not being projected, the screen is clear and completely unobtrusive, allowing customers and visitors to both look at and look through the screen.

Perspex® Clear Vision is perfect for point-of-sale applications in retail stores, window displays, airports, stations, banks and other high traffic areas.

Screens made using Perspex® Clear Vision have a superb 170° viewing angle and give an extremely bright, clear image - even in brightly lit environments.

## Technical Data

Sheet size	3050mm X 2030mm
Thickness	3mm and 5mm
Gain	Good
Viewing angle	170°
Image contrast	Excellent
Translucency	Clear
Can be shaped	Yes
Availability	Made to order

PERSPEX®  
FROM LUCITE®

# New Perspex® Vision - what you see is what you get!

In today's world of high impact, high profile and high value communications, getting your message across to your customers has never been more important. Competition for their attention is intense so having your brand, message and identity clear for all to see is a must.

## And that's where Perspex® Vision comes in

Perspex® Vision is an innovative new range in the Perspex® from Lucite® portfolio. It has been specifically designed to create rear projection screens that project superbly sharp images, perfect for the advertising, POS/POP and promotion sector.

Perspex® Vision includes two new products – **Perspex® Clear Vision** and **Perspex® Hi Vision** - each offering a particular combination of product benefits and characteristics to meet your specific communication needs.

# PERSPEX® HI VISION

Perspex® Hi Vision is a smooth opaque sheet which offers excellent clarity and brightness of image. And if you require a subtle, opaque screen when not projecting the image, or need to hide illumination points with a greater degree of certainty then Perspex® Hi Vision is the best choice for you.

Perspex® Hi Vision has excellent translucency and will retain the full clarity, sharpness and contrast of your projected image. Screens made from Perspex® Hi Vision have a spectacular viewing angle of 175°.

Perspex® Hi Vision can be colour matched to your specific requirements for optimum projection.

## Perspex® Vision

- **Excellent clarity for super sharp images**
- **Flat or curved screens for optimum use of floor space**
  - **Lightweight screens which are easy to install**
  - **3mX2m sheet size for larger high impact images**
- **Extremely hard wearing and durable for longer life screens**
  - **Guaranteed Perspex® quality**
